### **ECOWAYZ INTRODUCTION AND APPROACH MATRIX**

Ecowayz International, LLC (Ecowayz) represents a consortium of companies and manufacturers specializing in technology, materials and methods that are Green, Sustainable, Cost effective and Renewable.

Our Mission is to utilize our capabilities to participate in the efforts to enhance Resilience and Sustainability Globally.

Our background is in disaster restoration and restoring multiple communities after they have been devastated by acts of God and/or natural occurrences like tornadoes and hurricanes. Our parent corporation that has been in existence since 1985 based in the State of Florida, USA is Nikon® Construction, Inc. (NCI)

You may visit [www.niconinc.com](http://www.niconinc.com) to get a better understanding some of our capabilities.

Our restoration experience has allowed us to gain a good understanding of the effects of old building standards while interfacing new standards into our projects making them more resilient to the effects of natural disasters. The years of experiencing restoration and development of new standards being implemented in the construction industry is partially responsible for the development of the ECOWAYZ consortium.

The Ecowayz consortium possesses multiple types of second and third generation technology aggressively involved in sustainable design developments. The Ecowayz consortium covers many of the components necessary to develop a region and/or solve infrastructure, housing and community development needs.

Examples of the companies and technology we represent range from converting air to drinking water, renewable energy like second generation vertical axis wind driven power producing turbines to fast track cost effective energy efficient construction methods.

The Ecowayz consortium is able assist developing regions gain a better understanding of the micro and macroeconomic impact proper planning has in order to have sustainable economies that generate employment for the communities being developed.
