WATER GENERATION

OUR UNITED NATIONS

2 billion people lack access to safe drinking water.

Only 1% of Earth's water is drinkable and is shared between man, plants and animals!

By 2025, 2/3 of the world's population will lack proper access to clean drinking water.

The World Health Organization, estimates that 80% of all Third world illness is caused by contaminated drinking water.

Every 8 seconds a child dies of water related disease which is 10,000 children a day.
